

# ***Spiritual Science Studies (Spirit Communications)***

The College of Metaphysical Studies presents a workshop in:  
***Spiritual Science Studies (Spirit Communications)***  
Saturday, January 30, 2016, 10 am – 4 pm, at the Clearwater Campus:  
18514 U.S. Hwy. 19 N., Clearwater, FL. 33764  
**The Instructor is Rev. Dr. Kay Robinson**

## ***Introduction to Spirit and Spirit Communication***

Communication is possible only through compliance with God's law. It is a most sacred communing, afforded to humanity through God's grace, and we on the physical plane should approach it with reverence and appreciation. Spirits, the spirits of our so-called dead, once men, women and children who lived their lives on earth, have survived the change called death. They still possess their conscious individuality and identity, and they seek to commune with us by laws which men of science and those in the common ranks of life do not as yet understand.

## ***Immortality and Transition***

Natural science has not as yet, come forth with a proof of immortality. It is true that many scientists have offered the opinion that some day science will defend and offer proof of life beyond the grave, but there still remain questions which the average material mind cannot answer. This, though, must be recognized: A process in simple arithmetic is not a matter of science, as far as a kindergarten pupil is concerned. Nor has an operation in algebra any meaning for the pupil who has never gone beyond simple arithmetic. Thus it is with geometry, trigonometry, botany or any of the other exact or natural sciences.

## ***Practical Approach to Spirit Phenomenon***

This mini-course is intended for the layperson who is curious about a good many topics that fall under the "alternate realities" umbrella. We use the term "alternate realities" for want of a better one. "Occult" is too limited and, for many, a tainted term; "supernormal" has its limitations as well. Unfortunately, there is no broad, definitive term to describe the range of subjects that arouse one's curiosity on a spiritual quest. "Alternate realities" suggests the worlds that open up through many paths of inquiry.

## ***The Varieties of Spirit Manifestations***

Various types of spirit manifestation come under careful scrutiny in this 3 lesson mini-course. You the reader are invited to confirm or deny, if you can, the existence of such manifestations as ghosts, nature-spirits, angels and spirit guides. These are but a few of the subjects, including documented case histories that you will find within these pages. Included are: Apparitions; Poltergeists; Hauntings; Ghost Lights; Nature Spirits; Fairies; Thought-Forms; Devas; Demons; Psychic Attack; Spirit Teachers; Spirit Bands; Spirit Control; Spirit Guides; Angels; Guardian Spirit; and Drop-In Communicators.

**The course is required for students wishing to certify as a Medium or intuitive practitioner**, although the class is open to the public. The tuition is \$150.00 which includes the costs of textbooks and exam fees.
